REACT SHOPPING CART

1. Please copy and paste the attached folders in Magento root folder.

2. Run Magento setup upgrade, compile, deploy static content and finally clear and flush the caches.

3. After installing, cart button will be visible in all pages. We can able to connect to the react cart using this button.

4. Next, please go to terminal at folder magentoroot/ swiftcart and start npm using the following command

"npm start"

5. Add any products as a registered customer / guest and click on the cart button on the top to view the react shopping cart.
